

O.K. TRANS 2021

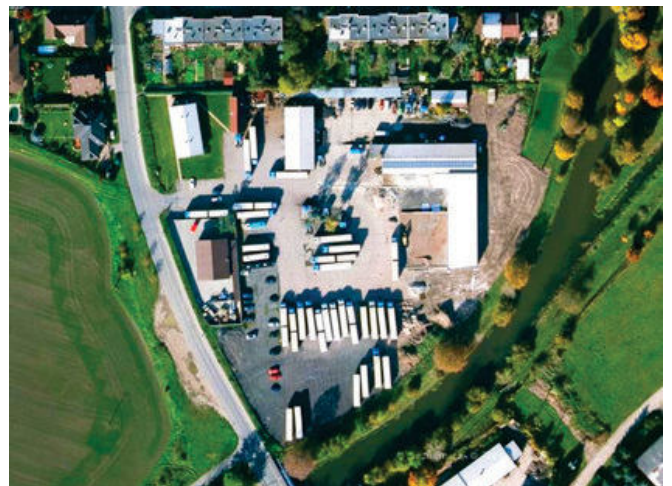

SUMMARY OF THE FIRST HALF OF 2021

PAT THE BEGINNING OF 2021, COMPANY O.K. TRANS HOLDING HAS CONFIRMED ITS GROWTH STRATEGY THROUGH ACQUISITIONS OF OTHER COMPANIES. AFTER ŠIMON & KOLMAN IN 2018 AND VIZOCARGO IN 2020 ZDENĚK TOMÁŠEK S. R. O. JOINED THE GROUP.

Zdeněk Tomášek s. r. o. is based in Chlumec nad Cidlinou. Area in Chlumec has its own gas station and hostel for foreign drivers, also there is a warehouse mainly used for transshipment of goods.

We should also not forget on service hall, although most of the repairs are provided by a service vehicle. During 2021 Web Dispatching was implemented, through which we can monitor better the driving style of drivers. It helped us to speed up with processing of trips and for billing trips, because we started using an electronic route.

In May we started using Navision software in which the entire company now operates involving transport, drivers billing etc... At the beginning there was a problem to cooperate with Zdeněk Tomášek company because they weren't using Navision. We have to mention our fleet renovation, in 2021 40 vehicles were replaced and we plan to continue in this trend.

O.K. TRANS PRAHA

WITCH

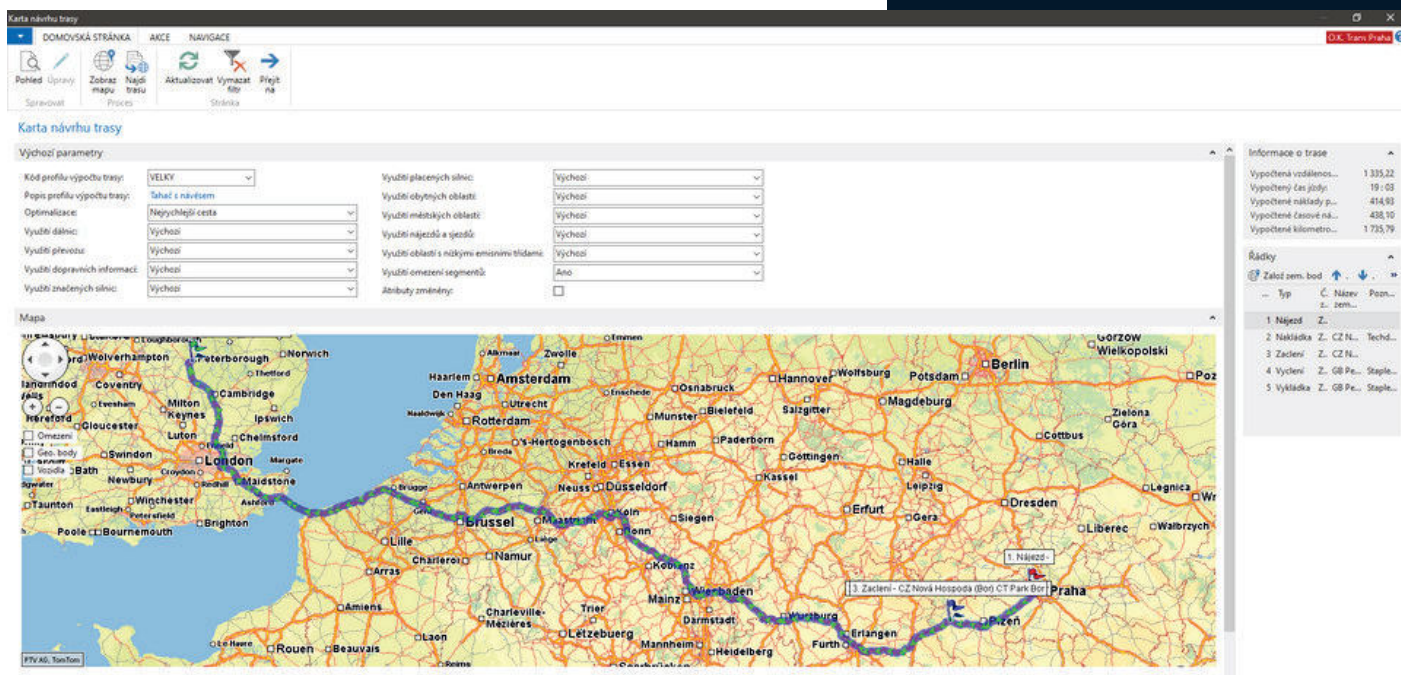

30th March 2021 our colleagues from headquarters in Chýně becomes a Witch. Their costumes were amazing and we have to mention license plates on their brooms. Fortunately, the burn did not take place so you can still see them all in Chýně.

UPGRADE TO BUSINESS CENTRAL

At the end of April, we updated the Navision software to Business Central. The change was inevitable, an older version would no longer be supported this year. The transition didn't go smoothly, so we thank all employees for their patience.
